

ALNAGOM DASH BOARD

A screenshot of the ALNAGOM Dashboard. The top navigation bar includes links for 'النحو' (Dashboard), 'لوحة التحكم' (Control Panel), 'جوراتي' (Reports), 'تصنيفات' (Categories), 'عروض' (Offers), 'المستخدمون' (Users), 'الطلبات' (Orders), 'ادارة المتجر' (Shop Management), and 'المتاجر' (Shops). The main content area features four cards with statistics: 'عدد المنتجات' (34 products) with a yellow background, 'عدد المستخدمين' (15 users) with a light blue background, 'عدد التصنيفات' (5 categories) with a green background, and 'عدد الطلبات' (0 orders) with a light orange background. A message at the bottom right says 'Activate Windows Go to Settings to activate Windows.'

About Us

The Alnagom Dashboard provides a centralized control panel for managing the entire website efficiently. It allows administrators to view and manage product listings, update inventory, track orders, and monitor customer activity in real-time. The dashboard also includes tools for handling categories, managing users. Designed with a clean and intuitive interface, it ensures quick navigation and smooth management, making it easier to run the online store effectively.

Admin Dash Board

The Alnagom Dashboard is a central control panel that allows administrators to easily manage products, categories, orders, and users. It provides quick access to essential tools and reports, enabling efficient website management through a clean and intuitive interface.

The image displays three screenshots of the Admin Dashboard, each showing a different section of the application:

- Users Section:** Shows a list of users with columns for ID, name, email, and status. A sidebar on the left provides navigation links for categories like لوحة التحكم (Dashboard), حجوزاتي (My Bookings), التصنيفات (Categories), العروض (Offers), and المستخدمون (Users).
- Categories Section:** Shows a list of categories with columns for name, description, link, and status. A sidebar on the left provides navigation links for categories like لوحة التحكم (Dashboard), حجوزاتي (My Bookings), التصنيفات (Categories), العروض (Offers), and المستخدمون (Users).
- Bookings Section:** Shows a list of bookings with columns for status, payment method, price, end date, and user information. A sidebar on the left provides navigation links for categories like لوحة التحكم (Dashboard), حجوزاتي (My Bookings), التصنيفات (Categories), العروض (Offers), and المستخدمون (Users).

► User Management

The Users page allows administrators to efficiently manage all registered users on the website. It provides full control over user accounts, including adding new users, editing profiles, assigning roles and permissions, and deactivating or deleting accounts when needed. With clear lists, search, and filtering options, admins can easily monitor user activity and maintain an organized and secure system.

► Products Page – Alnagom Dashboard

The Products page allows administrators to efficiently manage all items in the store. It provides options to add, edit, or delete products, assign them to categories, set prices, upload images, and manage stock levels. The page also supports search and filter functions, making it easy to locate specific products quickly. Designed for clarity and speed, it ensures smooth inventory management and accurate product organization for the online store.

➤ Categories Page

The Categories page allows administrators to efficiently manage product classifications. It provides options to create, edit, and delete categories, ensuring that products are well-organized and easy for customers to navigate. This helps enhance the shopping experience and keeps the store structure clear and logical.

➤ Orders/Bookings Page

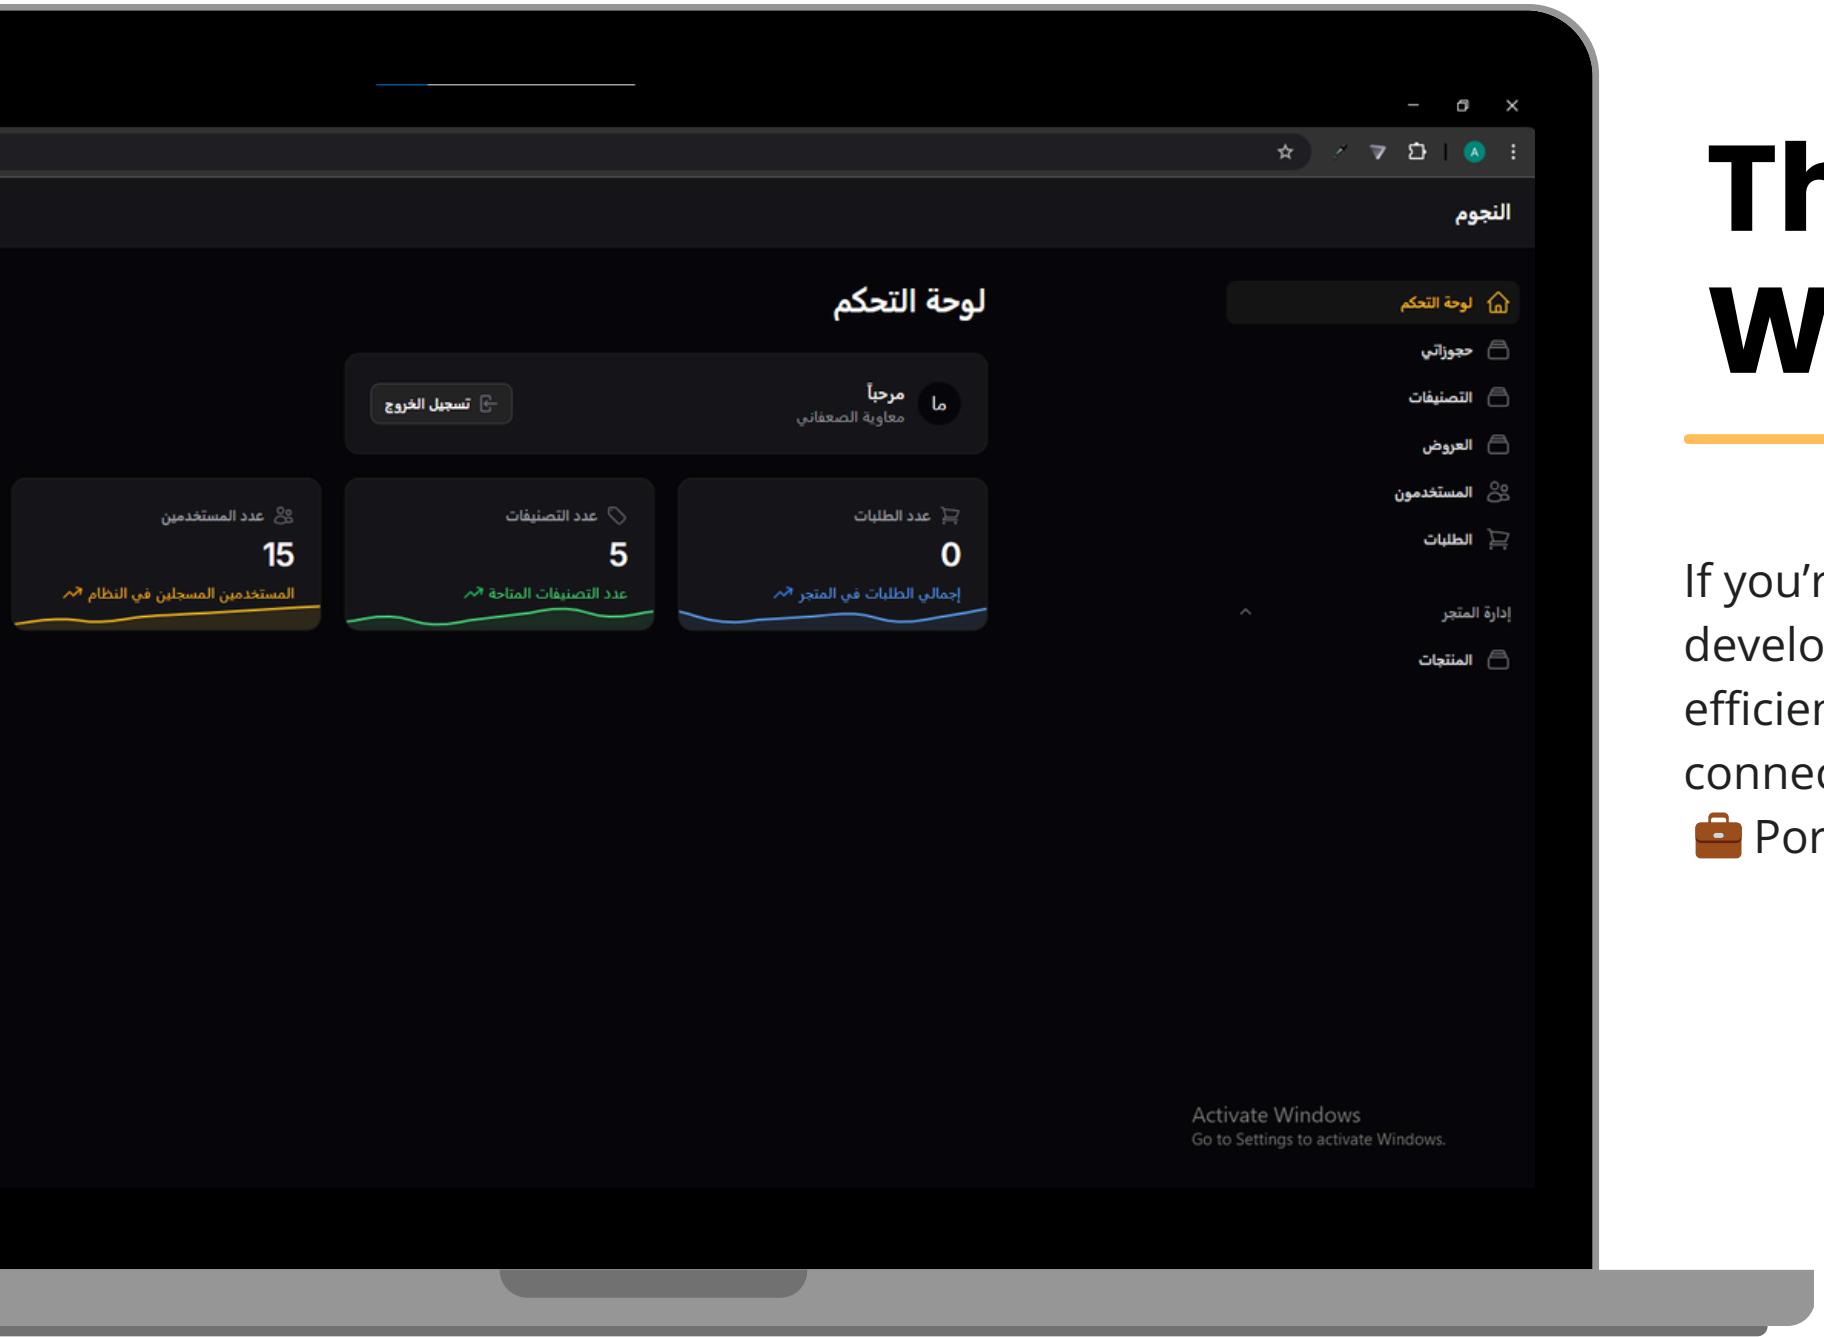

The Orders (or Bookings) page enables admins to monitor and manage all customer orders or reservations in real-time. It shows order details, status updates, and payment information, allowing quick action on pending, completed, or canceled requests. This ensures smooth processing and improves overall customer satisfaction.
